EXPERIENCE

AccuWeather

Team Lead & Senior Developer

2021 February to Present

- Lead team of 5 developers, including weekly 1-1 meetings, team and personal goal planning, and conduct yearly reviews, and managed sub-contractors working with the team
- Created documentation for consistent interview questions and new hire onboarding for the department/team, including internal resources and technical setup
- Plan with Product Managers for future features, including timelines and team capacity, feature feasibility and technical considerations, and prioritizing multiple concurrent requests
- Participate in daily team stand-ups to coordinate progress on features, bug priority, design changes, or QA team feedback
- Cross train developers on AFB business app, and improve core code base knowledge by rotating features and bug topics among developers
- Communicate with Product Managers and business owners on app updates, app releases, and fielding/fixing high visibility bugs
- Test and update Xcode application with Dev-Ops to ensure smooth operations on CI servers when major changes occur
- Review code changes, oversee app architecture, ensure best practices are used, recommend code changes or project updates for efficiency
- Raised importance of needed QA environment, leading to back-end system being created to mock weather data
- Advocated for several user features that were approved and chosen to be fully designed and implemented
- Rallied team to work on high priority subscription features under tight deadline requirement
 - Used new code style/language features, worked through learning and bugs while developing
 - Created new revenue stream
 - Refactored parts of ad-serving code to realize additional revenue from free app users

Mobile Applications Developer

2014 July to 2021 February

- Develop and improve flagship mobile app, full SDLC
- Collaborate with UI/UX Designers on feature implementation, graphics, animations, and interactions
- Lead localization efforts, SME for app translation workflow, spearhead RTL language changes in apps
- SME for Connected Car technology/SDKs (Ford/SDL, Bosch)
- Integrate 3rd party SDKs, communicate with vendors on best practices
- Especially skilled developing UI features using auto layout engine, MVC and MVVM patterns

- Work with QA, Product, Project, & Design teams; Agile methodology
- Prototype app features and ideas
- Experience with network API's, json & xml response, unit testing

CorvetteDNA

Lead Developer and Designer

2013 June to Present

- Developed and redesigned Flagship application for iOS
- Lead the implementation of analytics strategy
- Manage Apple AppStore and Google PlayStore app distribution
- Design and development of **CDNA Trivia** game application
 - Work with team on game play, levels, rewards, in-app purchases
 - Develop application, test iterations with team via TestFlight
 - Conduct in-person user testing with target user demographics
 - Produce all graphics, sounds, photography, and videos
- Design graphics/ads for clients for apps and web ads
- Rewrote Android app, deployed to Play Store

Clipper Magazine

Process Engineer & Developer

2009 August to 2014 July

I created numerous apps/processes to automate the creation of ads by graphic artists, the output of press-ready PDFs, and conversion of files to online/web-ready ads, and lead training for the systems.

- Created desktop app to query business database, then pre-fill documents with correct client info for graphic artist to create the ad
- Member of team to spearhead building the system to automate online coupon creation
 - Created framework system to tag documents
 - Developed automated system to export the data
 - Created detailed training documentation
 - Lead presenter for in-person & video training sessions
 - Listened to user feedback and implement features and updates
- Created automated file tracking system, and numerous other applications

Prepress Specialist

1998 March to 2009 August

- Created and manage organization system for terabytes (TB) worth of image & file backups
- Liaison with print providers to optimize files and workflow for minimal print production issues
- Expert Photoshop image manipulation including
 - Composite images, people, objects, ie perform 'Photoshop Magic' on a daily basis

PASSIONS

- 23 Year member in Sports Car Club of America
 - Regional Executive of club of over 280 members, 2013-2014
 - Solo Chairman, in charge of race event operations, presentation of rules at events to drivers, and design of course 📌
 - Always a member of core workers group to help run events
 - Competitive driver with numerous class wins and Fastest Time Of Day at events in a Pontiac Trans Am 🏆
- Instructor for teenage driving school "BRAKES"
- Red Velvet cake baker & connoisseur
- Unafraid of public speaking, tv/radio interviews, or making an overhead office page
- Competent with power tools & building projects
- Not-so-secret interest in welding 🔧
- Interested in world cultures and have visited other countries
- Baritone sax enthusiast 🎷 (but not a musician)
- IndyCar, IMSA/Sports Car, Le Mans racing fan
- Photography

EDUCATION

Hagerstown Community College, 2013, Online learning in SQL, PHP, CSS, HTML

Big Nerd Ranch, 2009, Certificate for Objective-C and Cocoa programming
